DETAILED ACTION

Claim Objections

1. Claims 1 and 3 are objected to because of the following informalities: in claim 1, lines 15 and claim 3, line 9, it appears the term "moisture" has been omitted from the intended phrase "blowing moisture out of the endless cloth". Appropriate correction or clarification is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Steiner et al.
4. Steiner et al. teaches a method for treating a web 51 comprising heating transport rolls 9, 11, 13, 29, 31, and 33; heating endless cloths 27 and 35 stretched around the transport rolls; heating the web 51 by contact with the endless cloths; releasing moisture from the web 51 to the cloths 27 and 35; transporting the web 51 through zone 1; and blowing moisture out of the cloths 27 and 35 with blowers 55 and 59. Note column 6, line 56- column 7, line 62 and Figure 1.

Allowable Subject Matter

5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lehtinen et al., Vainio, and Puumalainen teach similar web treating apparatus.
